OPEN SOURCE

React Native Reanimated Contributor — Merged **bug fixes and performance improvements** into the official react-native-reanimated repository (Software Mansion). Authored **independent npm packages** with active community downloads. One of a small number of external contributors accepted into this core animation library used by millions of React Native developers.

ABOUT

React Native Engineer with **7+ years** building and shipping **production mobile apps** across **healthcare, finance, and e-commerce**. Deep expertise in **performance-optimised UI, offline-first architecture, native module integration**, and end-to-end **App Store / Play Store** delivery. Contributor to core React Native ecosystem libraries.

TECHNICAL SKILLS

Core: React Native, Expo, TypeScript, JavaScript

Navigation & Animation: React Navigation, Reanimated 2, Gesture Handler, Animated API

Device & Platform: Native Modules (iOS/Android), Deep Linking, FCM/APNs, FaceID/TouchID, EAS Update (OTA), Expo EAS Build

State & Storage: Redux Toolkit, Zustand, Context API, MMKV, AsyncStorage, SQLite

Forms & Validation: react-hook-form, Formik, Yup, Zod

Offline & Sync: Offline-first architecture, background sync, conflict resolution strategies

Testing: Jest, Detox, React Native Testing Library

CI/CD & Release: GitHub Actions, Fastlane, EAS Build, App Store, Play Store

AI & GenAI: OpenAI API, RAG, Embeddings, Pinecone

WORK EXPERIENCE

e.Soft Technologies

Oct 2021 – Present

Mumbai, India

Senior React Native Developer

Feb 2023 – Present

- Owned end-to-end **React Native development** for **StaffWorks** — a real-time workforce management app serving **5,000+ concurrent users**; integrated **Socket.io** for live location tracking and shift updates, handling production hotfixes during live release windows.
- Drove **OTA update strategy using EAS Update** — reduced critical fix delivery from days to under 30 minutes without App Store re-submission, significantly improving incident response time.
- Built fully automated **iOS and Android release pipelines** using **GitHub Actions** and **Fastlane** — eliminated manual build errors and cut release preparation time by **~70%**.
- Collaborated with backend team to implement **API-level Redis caching strategy** that cut mobile-perceived latency by **~40%**, directly improving app responsiveness and session retention.
- Mentored **4 junior React Native developers** on animation patterns, platform-specific behaviour, and mobile performance — post-release crash reports dropped **quarter-over-quarter**.
- Established **mobile-specific code review standards** and PR checklist adopted across the team, reducing review cycle time and production regression rate.

React Native Developer

Oct 2021 – Feb 2023

- Delivered core **React Native features** for **RapidGST** — a GST compliance app with **50,000+ MAU**; achieved **60fps animations** using **Reanimated 2** and **Gesture Handler** across iOS and Android, eliminating jank on mid-range devices.
- Integrated **FCM/APNs push notifications** with deep linking, enabling direct in-app navigation from notification tap across both platforms.
- Built **offline sync architecture** using **MMKV** for fast local storage and background sync-on-reconnect, keeping the app functional under poor network conditions.
- Implemented **biometric authentication** (FaceID/TouchID) with JWT token refresh and protected navigation stack on both iOS and Android.
- Wrote **Jest** unit tests and **Detox** end-to-end tests covering critical user flows, reducing manual QA cycles and catching regressions pre-release.

Osizone Services Pvt. Ltd

Jun 2019 – Aug 2021

React Native Developer

Noida, India

- Built **Aarogyam** — a healthcare mobile app serving **100,000+ patients** across **12 specialties** — consolidating appointment scheduling, medical records, and billing into a single experience, increasing engagement by **30%**.
- Replaced **8 paper-based clinic workflows** with mobile-first screens using **react-hook-form** and local **SQLite** storage, cutting average patient wait time by **15 minutes per visit**.
- Engineered **offline-capable screens** with **AsyncStorage** sync-on-reconnect queue — kept the app fully functional in low-connectivity rural clinic environments.
- Managed complete **App Store and Play Store submission lifecycle** — build signing, provisioning profiles, review compliance, and staged rollouts across multiple releases.

KEY PROJECTS

SmartWMS – Multi-Tenant Warehouse Management SaaS

Jan 2025 – Present

React Native, TypeScript, Razorpay

- Solo-architected and built **SmartWMS** end-to-end — **web dashboard**, **React Native mobile app**, and **backend APIs** — as a **multi-tenant SaaS** with per-tenant **schema isolation** and screen-level **RBAC**, so new 3PL/FMCG clients onboard without touching another tenant’s data.
- Built a **GST e-invoicing engine** computing **CGST/SGST/IGST** from each SKU’s **HSN** code, auto-registering the **IRN with signed QR**, and raising **e-Way Bills** off the same invoice to eliminate duplicate filing.
- Shipped the **React Native** companion app for warehouse floor and delivery staff — **barcode-driven** receive/putaway/pick/pack/ship, **cartonisation** and pack verification, and **proof-of-delivery** capture with driver signature and timestamp.
- Built a live top-down **warehouse map** tracking stock by zone, status and 3PL owner, with **cycle-count**, **cold-chain** temperature and **RFID** feeds updating on-hand in real time; integrated **Razorpay** for self-serve subscription billing across tenants.

Aarogyam – Healthcare Mobile Platform

Jun 2019 – Aug 2021

React Native, SQLite, AsyncStorage, react-hook-form, REST API, AWS S3

- Mobile app for **100,000+ patients** across **12 medical specialties** — unified appointments, records, billing, and prescription management in a single offline-capable React Native app.
- Replaced **8 manual paper workflows** with digital mobile screens, cutting per-visit wait time by **15 minutes**; offline-first design kept rural clinic staff productive in zero-connectivity environments.
- Sole mobile developer — owned full delivery from UI design to **App Store/Play Store** submission and staged production rollout.

FertilityAnswers – AI-Powered Mobile Q&A

Feb 2026 – Present

React Native, Expo, TypeScript, OpenAI API, Pinecone, Redis, AWS

- Cross-platform mobile app for **300+ domain experts**; built **RAG pipeline** (OpenAI + Pinecone) improving answer relevance by **~60%** over keyword search.
- Integrated **FCM/APNs** with **offline message queueing** — zero notification loss on reconnect; deployed via **Expo EAS Build** with staged **EAS Update** OTA rollouts.

CareHudl – Healthcare Mobile Platform

May 2023 – Dec 2023

React Native, TypeScript, Twilio, MMKV, Redis, Docker

- **Offline-first** app for **500+ practitioners** — charting time cut by **37%**; **FaceID/TouchID** with **MMKV encrypted storage** for PHI — passed full **HIPAA compliance audit**.
- Integrated **Twilio Video SDK** with adaptive stream quality for reliable telemedicine on low-bandwidth mobile connections.

RapidGST – GST Automation Mobile App

Jan 2026 – Present

React Native, TypeScript, RabbitMQ, AWS, Redis

- Companion mobile app syncing **multi-platform seller data** via **RabbitMQ** pipelines; reduced GST filing time from hours to **under 5 minutes** with one-tap submission workflow.
- Built **optimistic UI updates** with local state rollback on failure and **background task scheduling** for pre-computation — app always ready to file without manual refresh.

ACHIEVEMENTS

Employee of the Year

×2

e.Soft Technologies — recognised for mobile delivery impact and team mentorship

Stack Overflow

1,008 reputation · 14 badges · 335-day streak — active contributor on React Native topics

EDUCATION

Mahatma Gandhi Kashi Vidyapith

Varanasi, India

Bachelor of Computer Applications (BCA)

Feb 2016 – May 2019
